How Embracing Open Source Built Google

Quick History of Open Source

From: torva...@klaava.Helsinki.FI (Linus Benedict Torvalds)
Newsgroups: comp.os.minix
Subject: What would you like to see most in minix?
Summary: small poll for my new operating system
Date: 25 Aug 91 20:57:08 GMT
Organization: University of Helsinki

Hello everybody out there using minix -

I'm doing a (free) operating system (just a hobby, won't be big and professional like gnu) for 386(486) AT clones. This has been brewing since april, and is starting to get ready. I'd like any feedback on things people like/dislike in minix, as my OS resembles it somewhat (same physical layout of the file-system (due to practical reasons) among other things).

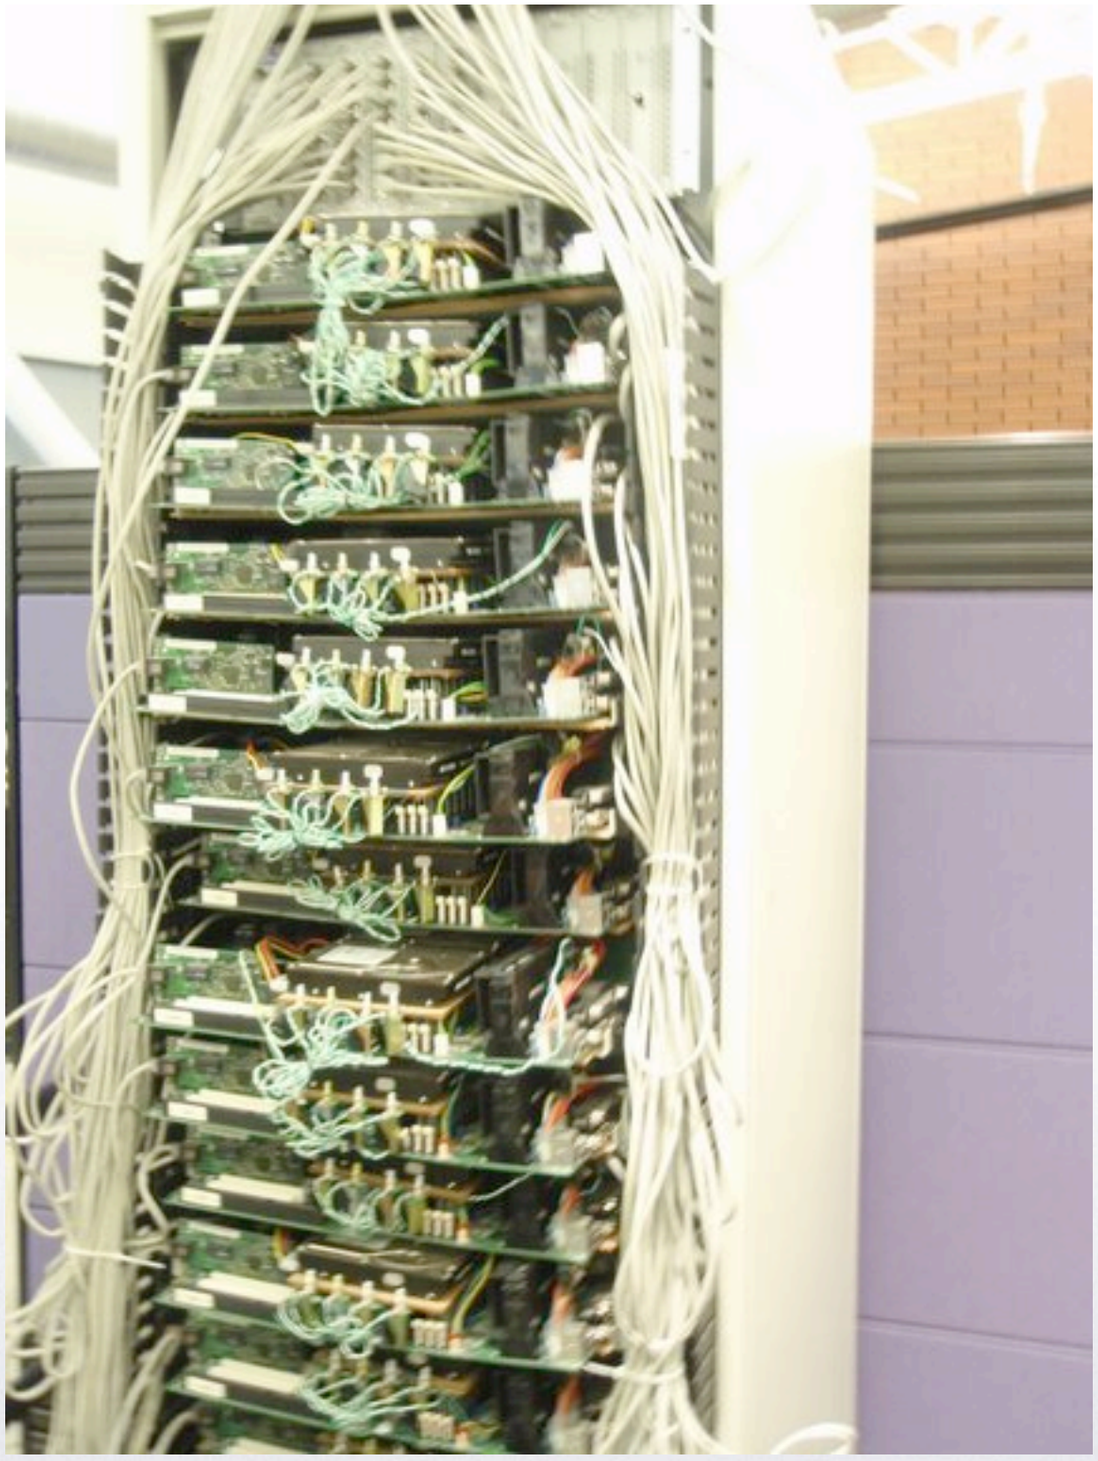

I've currently ported bash(1.08) and gcc(1.40), and things seem to work. This implies that I'll get something practical within a few months, and I'd like to know what features most people would want. Any suggestions are welcome, but I won't promise I'll implement them :-)

Linus (torva...@kruuna.helsinki.fi)

PS. Yes - it's free of any minix code, and it has a multi-threaded fs. It is NOT protable (uses 386 task switching etc), and it probably never will support anything other than AT-harddisks, as that's all I have :-(.

Principles of Open Source

FREE BEER

FREE BEER (versão 3.4) é uma cerveja de código aberto. A **FREE BEER** é feita com base nas tradições clássicas de fabricação de cerveja. Tanto a receita como os principais elementos visuais da **FREE BEER** são distribuídos através de uma licença Creative Commons (Atribuição-Compar-tilhamento pela mesma licença 2.5). A licença permite que qualquer pessoa use a receita ou crie novos produtos a partir dela para fabricar sua própria cerveja livre. A licença permite também que qualquer pessoa possa modificar o design e os aspectos visuais da **FREE BEER**. Assim, pela licença adotada, é permitido inclusive ganhar dinheiro com a fabricação da **FREE BEER**, ou sua versão dela. A única condição é que as modificações e melhorias na fórmula e na identidade visual sejam também distribuídas com a mesma licença aber- ta e crédito seja dado ao trabalho original

Para obter a receita, os elementos visuais e mais informações sobre a **FREE BEER**, acesse o site www.freebeer.org.

Ten Things

Focus on the user and all else will follow.

It's best to do one thing really, really well.

Fast is better than slow.

Democracy on the web works.

You don't need to be at your desk to need an answer.

You can make money without doing evil.

There's always more information out there.

The need for information crosses all borders.

You can be serious without a suit.

Great just isn't good enough.

New since last time: 176 messages

Description: The team uses this list to discuss technical issues and announcements. Posts will include topics such as discussions on how to reduce memory consumption, how certain code areas are implemented and how to extend or improve such code. This is a moderate volume, high technical content mailing list.

Last modified on 2009-03-23 20:19:22.123497 by Sverre Rabbelier

Welcome to the Google Summer of Code™ 2009 site!

We are now accepting applications from students for *Google Summer of Code* 2009! Please make sure to review the User's Guide before registering as student after which you can submit your proposal by clicking "Submit your Student Proposal" in the sidebar (under GSoC 2009). Student applicants should also be familiar with our program Frequently Asked Questions before applying.

We will accept applications from students through 19:00 UTC on April 3rd. For full details on timing, see the program timeline.

Folks interested in news about the program may want to subscribe to the Google Open Source Blog for regular updates. You can also review the list of mentoring organizations for 2009.

About Google Summer of Code

Google Summer of Code (GSoC) is a global program that offers student developers stipends to write code for various open source software projects. We have worked with several open source, free software, and technology-related groups to identify and fund several projects over a three month

News and developments from the open source browser project

Chromium and Google Summer of Code

Wednesday, March 25, 2009

Time is quickly running out for the students to apply for this year's Google Summer of Code.

The Chromium project has been accepted as a mentoring organization for this awesome program. This means that over the summer, you have the opportunity to work on new and exciting features for Chromium (and supporting projects) and experience browser development first-hand with a mentor from the project and real deadlines.

Full guidelines and details on how to apply can be found on the official gsoc website. To participate, pick an idea off our handy list or suggest one of your own (it's best to discuss it with a mentor first), then write up a proposal on how you'd go about accomplishing the task in the allotted time frame (3 months).

You can find a list of suggested topics here. These are only recommendations though, feel free to stop by our mailing list or irc channel and suggest something new. If you do decide to write your own proposal, we're looking for familiarity with the codebase, and lots of intelligent detail
